Notes:

Gloves are knit from ribbed cuff to fingertips. Thumb instructions are the same for both gloves and appear at the end of the pattern.

When returning held sts to needles to work fingers, place sts from each end of holder onto separate dpns or needle tips. This will make it easier to pick up sts and join in the rnd.

When picking up sts at base of fingers, instructions for picking up sts from the previously knit finger include an extra st in each “corner” between CO sts and sts that were on hold. This st will be decreased on the first round (except on index finger) and will minimize any holes at base of fingers. Use yarn tails to tighten any loose stitches at base of each finger before weaving in ends to finish gloves.

Try on gloves as desired to measure finger lengths before binding off each finger.
